Capacity sweep · 1,000 fixed epochs · 540 to 531,477 parameters
Weight / pair L2 = 0.0
Weight / pair L2 = 0.001
Training originals (750)
Reused validation (48)
10 × original meanings
Joint negative log likelihood
Learned head coefficients (log scale)
Three seeds: mean and min–max bands • no early stopping or calibration • reused validation, no test data
